

The Mahit is Esthetica's premium four-motor electric treatment table, built for hotel and resort spas. Electronic adjustments for the backrest, legrest, height, Trendelenburg, and reverse Trendelenburg put complete control at the therapist's fingertips. Gas spring-assisted armrests that lower and swing sideways, a manually adjustable headrest, and a detachable footrest give therapists the freedom to work with precision across massages, facials, pedicures, and foot treatments — making the Mahit as versatile as it is refined.

KEY FEATURES

Manually Adjustable Headrest

The Mahit's headrest can be manually angled to suit the client's position and treatment requirements, adding comfort and flexibility across a wide range of services — from massages to facials.

Programmable Handset with End-of-Treatment Position

The Mahit's programmable handset stores therapist-defined positions that can be recalled with a single touch. The End-of-Treatment function returns the bed to a pre-set position at the close of every session — saving time and ensuring a seamless, consistent guest experience.

Lowerable & Swing-Away Armrests

Gas spring-assisted armrests can be lowered and swung sideways, giving therapists unrestricted access during full-body treatments while ensuring guests remain in a natural, comfortable position throughout.

Veridura Phthalate-Free Upholstery

The Mahit is available in Veridura Phthalate-Free Upholstery, designed for professional spa environments, offering a safer surface for both clients and therapists. It resists stains, acetone, and disinfectants, withstands frequent cleaning, and ensures durable, fire- and abrasion-resistant performance.
