

The Mudra Electric Spa Bed by Esthetica is a professional-grade, high-end electric treatment table designed for premium spa and wellness environments. It features a fully electronic single-piece top cushion for superior comfort and seamless positioning. Electrically adjustable height, backrest, and legrest functions allow therapists precise control across every treatment. Lowerable gas spring-assisted armrests, generous built-in storage, and an integrated powerboard with storage space to accommodate a 10-litre hot towel cabinet make the Mudra as functional as it is refined — the ideal centrepiece for modern spas seeking performance and elegance in equal measure.

KEY FEATURES

Lowerable Armrests

The Mudra's gas spring-assisted armrests can be lowered when the client is in the prone position, enabling a more ergonomic and comfortable lying position while relieving any strain on the back — ideal for full-body treatments..

Programmable Handset

The Mudra Electric Spa Bed's programmable handset stores three therapist-defined positions. With one touch, the bed returns to a saved setting, saving time and allowing positions to be recalled repeatedly during treatments.

Storage Space & Electrical Sockets

The Mudra comes with generous built-in storage to accommodate towels, oils, and spa accessories, alongside an integrated powerboard with dedicated space to house a 10-litre hot towel cabinet and electrical sockets for treatment equipment.

Veridura Phthalate-Free Upholstery

Veridura Phthalate-Free Upholstery is designed for professional spa environments, offering a safer surface for both clients and therapists. It resists stains and disinfectants, withstands frequent cleaning, and ensures durable, fire- and abrasion-resistant performance.
