

The Tejas is Esthetica's premium four-motor electric treatment table, crafted from natural wood and wood veneer for hotel spas and resort wellness environments. Electronic adjustments for the backrest, legrest, height, Trendelenburg, and reverse Trendelenburg put complete control at the therapist's fingertips. Lockable gas spring armrests and a clean, open base design give the Tejas a warmth and understated elegance that feels entirely at home in a luxury spa setting — without compromising on the functionality that demanding spa environments require.

KEY FEATURES

Lockable Gas Spring Armrests

The Tejas's lockable gas spring armrests can be adjusted and secured at the therapist's preferred position, providing stability and unrestricted access during treatment while ensuring guests remain comfortable throughout.

Programmable Handset with Reset

The Tejas's programmable handset stores therapist-defined positions that can be recalled with a single touch — and reset instantly when needed — saving time between treatments and allowing therapists to maintain consistency across every session.

Open Base Design

The Tejas's clean, open base crafted from natural wood and wood veneer brings a distinctive warmth to the treatment room, setting it apart from conventional spa tables and elevating the aesthetic of any luxury spa environment.

Veridura Phthalate-Free Upholstery

The Tejas is available in Veridura Phthalate-Free Upholstery, designed for professional spa environments, offering a safer surface for both clients and therapists. It resists stains, acetone, and disinfectants, withstands frequent cleaning, and ensures durable, fire- and abrasion-resistant performance.
